

HYDRA

Copper Bright

Copper / Brass De-Scaler & Brightener

HYDRA®

Features & Advantages

- ◆ Fast acting chemical polish.
- ◆ Fantastic brightness copper & brass.
- ◆ Cleans nooks & crannies.
- ◆ Restores surfaces to as new look.
- ◆ Use on all copper water features.
- ◆ It is a chromate-free, acidic liquid chemical metal brightener.
- ◆ Effectively cleans indoor and out door metal fountains.

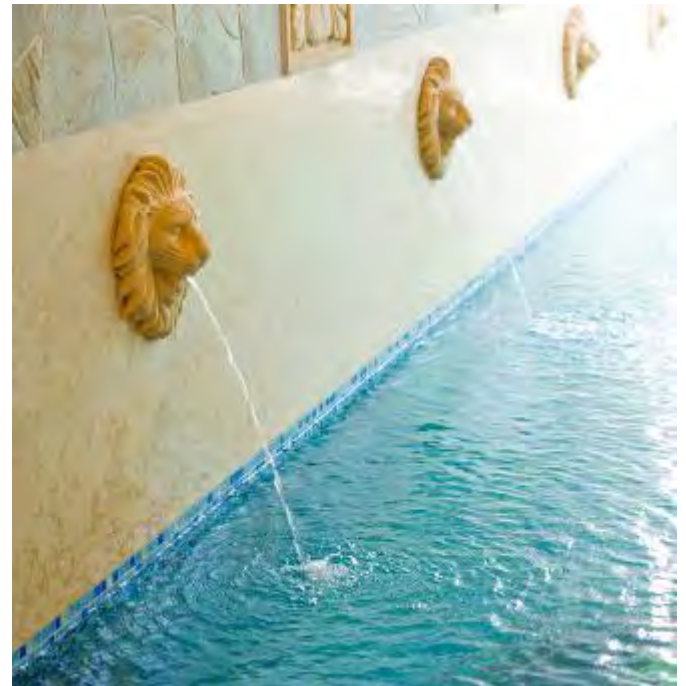

Description

Hydra Copper Bright is a chromate-free, acidic liquid chemical metal brightener. It's used in and through all types of copper and brass fountains and water features for brightening old and tarnished copper, brass and bronze parts.

Hydra Copper Bright's special chemical action eliminates time-consuming, tiresome, manual metal brightening and buffing of intricately and irregularly shaped parts with "nooks and crannies". With immersion in the chromate-free material at room temperature, a clear, metallic brightness is restored to metal surfaces that have been thoroughly pre-cleaned of all contaminants.

In just minutes, the acidic liquid metal brightener chemically dissolves and removes oxides, stains, tarnish and discolorations, from solid copper and its alloys. After thorough fresh water rinse, it leaves their surfaces bare-metal clean and shiny bright.

How To Use

Usage Rates

1 Kilo Treats 20L Of Water

30ml Level Spoon

Holds 30g Treats 600 ml (0.132 gal)

100 g Treats 2 ltr (0.44 gal)

250 g Treats 5 ltr (1.1 gal)

500 g Treats 10 ltr (2.2 gal)

Keep out of reach of children. Irritating to eyes and skin. Avoid contact with eyes and skin. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

METHOD OF USE

Dilute Hydra Copper Clean with 1:10 to 1:20 parts of water

Leave solution in contact until object has been brightened, run circulation pump if present. Rinse with clean water.

Laboratory Facilities

Hydra International Ltd's Research & Development Laboratories are a hub of activity where new products are developed and formulated. We have working relationships with our raw material suppliers, many of these suppliers are major world-wide chemical manufacturers with their own development laboratories.

As a company we are well known in the chemical industry for being receptive to cutting edge new chemicals which can be incorporated into our products to achieve performance advantages. An important part of the International Standards that we hold is that of constant improvement. We show that we have achieved this at every independent audit.
